Press Announcement: March 1, 2008

Dave Wertzberger and Mike Menath Insurance announce the formation of a new organization to focus on the insurance needs of organizations who are care providers for the elderly. Dave and Mike, together, have over 30 years of insurance industry experience.

The company, Sierra Professional Mabuhay, LLC has headquarters in Reno, Nevada and offices in Las Vegas. Business insurance products are available to companies located in six western states and for their offices nationwide.

The new organization focuses on risk management and commercial insurance needs to protect owner's business investment as well as the residents in these facilities. Sierra Professional has developed a special liability insurance product and has the exclusive marketing rights for Nevada, California, Utah and Arizona.

Payment services are improved with a new Bank of America deposit account that can be used at any BofA office. Premium financing is available from Capital Premium Financing.

Services include Liability insurance and Surety Bond documentation for BLC licensing requirements and Worker's Comp documentation for the Attorney General's office. A special fire/hazard policy (replaces homeowner's insurance) is available with commercial coverages, as required when a property has more than four residents.

Dave Wertzberger is available to advise on what limits are best for Liability coverages and Worker's Comp as well as property values.

New CE Course: The State of Nevada has approved a Risk Management course for three hours of (CE) Continuing Education for Long-Term Care Administrators. Taking this course will also lower your cost of insurance.
